## PROJECTS

### • **TourTur** (Full-Stack Tour Booking Marketplace)

[Live Link](#) | [GitHub](#) > [Client](#) | [Server](#)

A scalable travel marketplace connecting travelers and hosts with booking and payment features.

- Developed end-to-end booking system with real-time availability, search & filtering by location, price, and activity type.
- Built admin dashboard to manage users, tours, and payments with role-based access.
- Integrated secure payment gateway and JWT authentication for users and hosts.

**Technologies:** NextJS, ExpressJS, Mongod, Mongoose, Redis, Redux, ShadCN UI, Next Auth, JWT.

### • **HelpLagbe** (Local Service Hiring Platform)

[Live Link](#) | [GitHub](#) > [Client](#) | [Server](#)

A digital platform connecting users with nearby verified helpers for daily services and tasks.

- Implemented task posting, helper selection, and secure payment for users and service providers.
- Built a secure platform to post tasks, hire verified helpers, and complete payments after verification.
- Managed multi-role access (User, Helper, Admin) with role-based routing & protected APIs.

**Technologies:** React.js, Redux, ExpressJS, MongoDB, Mongoose ODM, ShadCN UI, Socket.io, JWT.
